Final Office Action

Acknowledgment is made of the response filed on 9/19/05. Claims 13-20 are pending.

No claim is allowed at this time.

Applicant's arguments were found persuasive therefore, rejection under 35 U.S.C. 103(a) as being unpatentable over BARTON et al¹ is withdrawn. Double patenting rejection is maintained for the same reasons as set forth in our previous office action.

This application claims benefit of 60/411,874 (priority date of 09/19/2002).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

¹ WO 01/41535 A2, published on June 14, 2001.

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 16-38 of copending Application No. 10/392,833. See especially compounds of claim 38).

Although the conflicting claims are not identical, they are not patentably distinct from each other because the compound of the formula in instant claim 13 is generically taught by the copending application's formula (II) in claim 16 when R_{7-1} represents furyl and R_{17} represents tetrahydropyranyl group. Lines 13-20 of Page 23 discloses a process for purifying a 7 α -substituted steroid of formula II comprising crystallizing 7 α -substituted steroid (II).

The instant claims differ from the copending application in claiming a crystalline form of the compound having a specific X-ray diffraction spectrum.

One skilled in the art would have been motivated to prepare a crystalline form of same compound because the copending application teaches it.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
